

Tested PATA/SATA Drive Compatibility List (7000/8000/9500S series)

Updated: January, 2006 (<http://www.3ware.com/products/compatibility.asp>)

Testing consists of 4 drives with RAID 0, 10, and 5 configurations. An intensive data integrity test is performed in each configuration to verify interoperability and compatibility with AMCC products. AMCC recommends burning in new disk drives for at least 48 hours before use.

Serial ATA (SATA) Drive List

Manufacturer	Model	Firmware	Capacity (GB)	Compatible	Comments
Fujitsu	MHR2020SA		20	Yes	2.5" drive
Hitachi	HDS722512VLSA80	V330A60A	123.5	Yes	
Hitachi	HDS722516VLSA80		160	Yes	
Hitachi	HDS722525VLSA80	V360A60A	250	Yes	
Hitachi	HDS722580VLSA80	V320A60A	82.3	Yes	
Hitachi	HDS724040KLSA80	KFAOA30A	400	Yes	
Maxtor	6Y060M0		60	Yes	Desktop drive
Maxtor	4R120L0		120	Yes	Desktop drive
Maxtor	6Y080M0		80	Yes	Desktop drive
Maxtor	6Y120M0	YAR51BW0	120	Yes	Desktop drive
Maxtor	6Y200M0	YAR51GW0	200	Yes	Desktop drive
Maxtor	6Y250M0	YAR51BW0	250	Yes	Desktop drive
Maxtor	6B300S0	BANC17M0	300	Yes	DiamondMax 10
Maxtor	7B300S0 ¹		300	Yes ¹	Enterprise markets

Western Digital	WD360GD-00ELX1	35.06K35	36	Yes	10,000 RPM drive
Western Digital	WD740GD-00FLA0	27.08D27	74	Yes	10,000 RPM drive

Note: AMCC/3ware cannot test every model disk drive from every manufacturer. We test a sampling of disk drives of different capacities and characteristics. If the PATA (or SATA) version of a drive is listed as compatible, then it is likely that the SATA (or PATA) version is also compatible.

Manufacturers sometimes make desktop edition and enterprise/RAID edition versions of their drives. AMCC/3ware recommends using the enterprise/RAID edition of the drives for RAID applications.

¹ See KB 11929 <http://www.3ware.com/kb/article.aspx?id=11929> regarding compatibility with the RDC-400

² RAID edition version of these drives are recommended for RAID applications
